Introductory Course for PhD Students at the Faculty of Science (0.5 credits)

Place and time
April 27, Lecture hall “Lundmarksalen” in the Astronomy Building, Sölvegatan 27, Lund.

The course, which is mandatory for research studies, is intended for doctoral students recently admitted at the Faculty of Science. The course aims to provide information on research studies at the faculty and on common human resources issues concerning e.g. leave, wage ladder, social insurance, parental leave and sick leave. This is your chance to find out what non-regulated working hours mean, how to use your individual study plan and which resources are available to you. The course also constitutes a platform for meeting other new doctoral students. The course will be given in English.

Morning
09:15-09:45 Introduction to the faculty and to PhD studies in general
Almut Kelber, pro-dean
09:45-10:30 The individual study plan
Almut Kelber, pro-dean
